A Gleam of Good Sense. The News of yesterday morning contains

the following item: The Washington correspondent of the Philadelphia Inquirer says: Mr. Buchanan remarked to a gentleman on Saturday, that all this fuss and parade, this marching of troops to and fro though the country, and this continual rub-a-dub of dram and life, was the d—at nonsense and folly in the world. That with eight marines he could have kept everything quiet at Charlestown, and in fact there had never been any danger of a disturbance there.

No doubt of it. The "noise and confusion" got up by Gov. Wise, in and about Charlestown, was merely for political effect. So, too, the meetings to "save the Union," under such painful circumstances. The which the "Old Fogy" politicians at the wronged husband did not need the money, vices to frighten the North into further concessions to the Slave power.

The Delay is Organizing the House.—The Sentinel compilates continually of the democrats for not electing a Speaker, Clerk, etc., of the House of Representatives. We did not know until within a few days, that it was expected that the democrats would elect those officers.—News, of yesterday.

The Sentinel has made no such complaint against the Democrats for the very sufficient reason that they have not the power to organize the House. But they have the power toldelay its organization and obstruct the public business, and this they have done persistently since the first hour of the session. But the end approaches. The "signs of the times" indicate that the Republicans will organize the House, in spite of Democratic Pro-Slavery fillibustering.

THE REAL DANGER TO THE UNION .- The Philadelphia North American gives the true source of danger to the Union, when it says that "no security for the Union will remain if the Democratic policy of irritation, its demagogues in Administration, and its fostering of Southern disunion fury continue for another Presidential term. Why is Democratic power steadily and surely receding to the seats of disunion feeling, and fixing itself there almost alone? It is universally asserted that the benefits of the Union are always certain on the side of the manufacturing, the commercial, the active and working North, however it may be with the planting South. It it held out as a ceercion of Northern opinion that these benefits will be cut off if the South recedes; but how can it be conceived that these States shall choose, by heavy majorities, steadily to increase their danger and to weaken their power? The charge is absurd. that our sweeping majorities are thrown to

spite ourselves merely. They are leveled at

the only disunion policy from which we

ARMY SIGNALS -- AN IMPORTANT BUFFALO ENVENTION.—The Washington correspon dent of the New York Courier & Enquirer writes: "The report of the Secretary of War will recommend to the attention and examination of Congress, with a view to its adoption, a by Dr. Meyers, of Buffalo. The object of these signals is to enable officers of an army to communicate information and orders to each other at a distance of from one to fitteen the fall to the object of the city, each other at a distance of from one to fitteen the fall to the object of the city, and the fall to the object of the city, and the fall to the object of the city. miles, by night or day. The whole apparatus is original, and is so compact that it can be carried in the hand of a single man on horse back. An officer with one attendant may go on a scouting expedition for miles around a camp and be in goastant communication with headof course now, and always must remain (in order to be efficient,) a secret with that porgeon in the Army for some years, and has been led to this invention by his observations and experience on the plains. It has the approval of the officers of the army in the War Department, so far as they have been able to examine it, as very ingenious and meritori-

ESPECIALLY FOR THE SOUTH .- The following passage in the prayer of Rev. Dr. BLAG-DEN, at the Union meeting in Fancuit Hall. Boston, is exciting comment:

"We pray for Thy blessing upon the whole country, especially upon the Southern section

Lis it possible that Dr. BLAGDEN jutended a little sly satire in that petition? Did he mean that the South most needed praying for?

THE Secretary of the Treasury last week ncknowledged the receipt of a letter from Newark, N. J., containing twelve hundred dollars, which the writer acknowledged to have defrauded the United States out of, and which he returns in order to stiffe the pangs of conscience, and regain his peace of mind. MR. SHEEMAN'S CHANCES. The States to-day concedes the certainty The States to-day concedes the certainty of Mr. Sherman's election, which our side never doubted. It is difficult to imagine the quarter in which Mr. Etheridge expects to get un accession of strength to give Mr. Gilmer thirty votes when his friends steadily refused to compliment one Northern roan. North-Western and other Democrats openly protest that they will not vote for any Ameri-oan, if Mr. Winslow and John Cochrane should make a hundred bargains.

In on with the other city papers, were accounted in these consuments whose communications were exclusively pullithed in these columns yesterday. It is not unlikely that wine and women were the mysterious influences used in all those cases. The case of Mr. Campau was different, and by no conclusions can be similarly accounted for. If is experience in city life, as well as his habits, was widely convexed to such conduct. It is experience in city life, as well as his habits, was widely opposed to such conduct. It is not presumed by any one that he was led away by any such influences. The only two causes for his disappearance that have been assigned are self-destruction or four piay.—

The former is not probable when his disposition and peculiar temperament are known. The latter is hard to believe, but affords the only reasonable explanation of the mystery. It this is the case, the assigning heaven and if they have not, they very ly this time, and if they have not, they very sen at fault even in the discovery of the

ATROCIOUS DETAILS .- Henry Jumpertz still remains in the city, and is yet an object still remains in the city, and is yet an object of mingled curiosity, aversion, and admiration—the feeling predominant differing according to the light in which he is viewed.—He yesterday spent some time in the City Marshal's office, and while there sold to C. P. Marshal's office, and while there sold to C. F. Bradley the saw with which, as he alleges, he cut up the body of Sophie Werner. On being asked if he also severed the head from the body with the saw, he replied that he cut off the head with an axe, which he also displayed. These articles, it will be remembered, were shown upon the trial, and have been kept in the care of the Marshal since his arrest two years ago. The conversation continuing on the subject of the disposition he had made of the remains, he stated that some one had let out the secret of what disposition he had made of the entrails of the woman.—He would confess, he said, what he had done with them, which was, that he boiled them with them, which was, that he boiled them down to get the blood out of them, and then those zealous young folks; the Good Tencarried them, in small parcels, and at different times, to the Tremont House, and put them into the water closeta there. This is quite a different story from that hitherto told by him, to the fact that he had buried the entrails upon the prairie, and had lorgotten the spot. It is understood, however, that he told one of the two lawyers who acted as his

The casting of this and the cylinder-which alone weighs about a ton and a quarter-was done by Mr. HENRY C. FURTHER PARTICULARS.—A sentinel stationed near the jail reported that at a quarter past eight he observed a man on the jail wall whom he challenged, and receiving no answer, fired at him. The head of another man was also seen above the wall, but he retreated as above at the first one had been retreated as soon as the first one had been fired at. The man on the top of the wall seemed at first determined to resist, and was about making an attempt to jump down when the sentinel declared his intention of impating him on his bayonet; he then retreated in-to the jail yard with Coppie and both gave themselves up without further resistance. Cook afterwards remarked that if he could have got over and throttled the guard, he would have made his escape. The Shenan-doah mountains are within ten minutes run doah mountains are within ten minutes run of the jall wall, and could he have reached these, with his thorough knowledge of the mountains, his arrest would have been difficult, especially as but few of the military could have been difficult, especially as but few of the military could have be followed him during the night. They had succeeded, after two weeks labor, whenever alone, and at night, when their bed clothing muilted the sounds of a saw which they had made out of an old barlow knife, in cutting through their iron-shockles, so that they could put them off at any moment they should have their work completed. They had also made a sort of chisel of an old soriew, with which they succeeded, as opportunity would offer, in removing the plactor from the wait, till a space large enough to pass through was opened, all except the removal of the outer brick.

They acknowledged they had been at work a whole week in making the aperture in the wall; their cell being on the first floor, the payement of the yard, and when freed of their shackles, their access to the yard was a smooth brick wall about fifteen feet high.

This was, however, soon overcome with the aid of the timbers of the scaffold on which Capt. Brown was hung, and which was intended for their execution on the succeeding day. They placed these against the wall and soon succeeded in reaching the top, from which they could have easily dropped to the other side, bad not the vigilance of the sen tinel on duty so quickly checked their movements. Throughout the day yesterday, there was a great influx of strangers and citizens.

Shortly after the arrival of the train in the afternoon a grand military dress parade of all the compathe arrival of the train in the afternoon a grand military dress parade of all the companies in attendance took place. The troops went through their evolutions with great skill, and were reviewed by Gen. Taliaferro, who was on the ground in full dress, and mounted on a spirited charger.

The prisoners were visited yesterday afternoon by Rev. Messrs. Naskan, Dutton and North, of the Preshytarian Chargh, and Ray.

The services in the cells were of an interesting and solemn character, and and the territorial authorities to product it while there. How then could it be expected that southern gents will consent to the election of Mr.

He would speak plainly and tell the gentlemen of the other side of the House that from the very foundation of the government there has been a diseased public sentiment in the Northern States on the subject of slavery—He spoke of the continued aggressions of the Republican party on the South.

Mr. Sherman's vote on the first bellot taken to day was reduced by some of those who had voted for him going over to Mr. Gilmer, who was supported by the following m.mh.rs:—Mesurs. Adams and Anderson, of Ky., Battles and Bailey, of N. Y., Brakson, Briggs, Brystow, Campbell, Dawes, Ethnidge, Hale and Harris, of Md., Haskin, Hatten, Hall, Jenkins and Leach, of N. ENECUTION OF GOOK AND COPPIE.

The bodies of the two negro prisoners having been brought back to the jail at about a quarter to 12 this P. M., notice was given to Cook and Coppie that their time was approaching—only one hour more being allowed. Another military movement, similar to that at the first execution, was repeated, and a wagon with two more coffins was standing at the door of the jail at 12 1-2 o'clook.

The same military excert was in readiness. Meantime the closing religious ceremonies were progressing in the cell. Since the failure of the aftempt of Cook and Coppie to escape, last night, their assumed composure and apparant resignation had given way, and they now looked all the reality of their fate, with the full conviction of its awful certainty.

They were reserved and quiet, but joined with fervor in religious ceremonies conducted by the Rev. Messrs. North. Letcher, and Vaugh. When called upon by the sheriff they stood calm and quietly whilst their arms were being phoned, and after bidding farewell to the guards of the jail, were helped into the wagon and took seats on their coffins. That appearance was rather that of hapless despair than that of resignation, and they seemed to take but little notice of anything as the procession slowly moved on to the field of death. The wagon reached the scalfold at 13 minutes before one o'clock, and the procession sacended with a determined firmtess rarely surpassed by that of and the procession ascended with a determined firmness rarely surpassed by that of Capt. Brown. A brief prayer was offered up by one of the ministers—the ropes were adjusted and the caps drawn over thein heads, and both were launched into eternity in seven minutes after they ascended the gallows.

They both exhibited the most unilinching firmness, saying nothing with the exception of bidding farewell to the ministers and Sheriff. bidding largerell to the ministers and Sheriff. After the rope was adjusted about Cook's neck, he exclaimed, "he quick, as quick as as possible," which was also repeated by Coppie. After langing about thirty minutes, both hedies were taken down and placed in black walunt coffins, prepared for them. That of Cook was then placed in a poplar box, labelled and directed as follows: "Asabel H. Willand and Robert Growley." 104. William Willard and Robert Growley, 104 William street, N. Y., care Adams Express." The coffin of Coppie was placed in a similar box to be forwarded to his mother in Iowa.

For the Sentine!

Mr. Editor:—The religious phrenzy attendant on the worship of the new God, Gosspium, which now prevails in the great cities of the sea-hourd, has reached the West; and the old guard of the Democracy of Wisconsin, have awakened to the necessity of increased exertions in the business of Union-

peace and prosperity of the Southern States; secondly, that every attempt at disunion that has ever been made in this country has originated at the South, where distratou scuti inated at the South, where distincts seent-ments are quite popular; thirdly, that the entire difficulty between the North and the South has grown out of the agilation of the Slavery question, which was first made a po-litical question by leaders of the Democratic party; fourthly, that the same party has in-terned the gainting topicies by it its annex. flamed the agitation immensely by its annexation of Texas, by the repeal of the Missouri Compromise, by its Karras cutrages, by its achemes for the spizure of Cuba, and by its cherishing as leaders men who desire to reen the infamous tradic in slaves; and dich y open the intamous traine in survey and ared by that the surest way of securing the stability of the Union is to restore the government to its pristine character as the government of a whole nation of freemen, not of a limit d

the ostensible object of these meetings i to assure the South that the people of the North cherish no unfriendly feelings towards them, and that such attempts as John Brown's do not find favor among them, whatever they may think of his person discrete. All that is perfectly proper, if it be required. But the South should be told that it has been the victim of its own silry prejudices and fears: that Brown's movement has been fears; that Brown's movement has over-greatly misrepresented and exaggerated, that he had no intention of making war upon Virgreaty instepresented and exaggrated, that he had no intention of making war upon Virginia, or exciting slaves to revolt: that he was a lamble on the subject of enamelating negrous, but after several years' operation had succeeded in getting together only seventeen condictors; that the judicy ous and fursy military demonstrations of Governor Wise alone have given national importance to the

de. Ode.Notes, and Mortgages negotiated. Axa. W. H. Robwar. M.January 17,1859. Janus Deckediy

WASHINGTON, Dec. 11.
Thank God for Sunday. We have at lesst a breathing spell after a whole week of the most intense excitement. The letters and despatches sent from this city to the New York and Northern press generally, have given no adequate idea of the state of mind in which members of Congress and citizens from all parts of the country met in the city of Washington on the first week of December, 1959. Language cannot convey it. It is not 1959. Language cannot convey it. It is not in the power of words to express it. You must meet your friend from the South and the fervor of the devotes, the mobbings, the burnings, the featherings, the burnings, the tarrings, the featherings, the insults, and the contumely inflicted upon the citizens of the Free States, found in the pression South of Mason & Bixon's line, with no word of condemnation for the outrages.

Our friends at the South entertain the opinion that the Democratic party at the North are divided, and forn by dissensions; that our efficiency is destroyed by our vasell-pations between popular rovereignty and Congressional intercention—between our allegiance to Dismat Jimmy and the Little Giant. But there is one question upon which we are united, and it is the main bond of our adhers indeed a unit. The persons whose names you find attached to this letter, have, in turn, is belonged to all the divers organizations that the contederacy, will not be succeed as fixed at the shoulders of a fixed syon, all say with an cloquence and feeding a throw a tit of it diversed to it always comes on just before a Presidential every four years, and, curiously enough, it is the same described in the South entertain the off whose in the securiously enough, it always comes on just before a Presidential every four years, and, curiously enough, it is the same always seem of Newport at the beginning of the summer of Newport at the beginning returning from the South, turned back by the deep feeling of distrust which has been silrred up in the minds of their Southern friends by the means above referred to. They are not Republicans. They are not anti-Slavery men. Some of them have been residents in the South for many years, and are themselves Slaverowners. Al. of them have have greatered and procedures of them have been conservative and pro-slavery men, the apologists of the institution. But even this avails them not now. To have been born on

Affairs at Washington

This state of things has been caused by cool, premeditated and persistent misrepresentation of facts for the purpose of defeating the destion of a Republican speaker now, and a Republican President next year. The projectors of the movement did not anticipate serious or permanent injury to trade between the North and South. They simply intended to defeat a party and gratify a spite against a man or against men whom they cordially hate and wish to politically destroy. To do this they did not hesitate to sow the wind, and now left them not complain if they are doomed to reap the whirlwind. The primary object, however, will hardly be successful. Southern Americans are now satisfied that here is no danger to be apprehended from the Republicans, and declare that they cannot nd will not affiliate with the Democrats.

They say the Damocratic party is not a Union party, but that it is a distunion party at the South, a here it derives its chief strength.— They have been fighting it there on this very issue, and the same men whom they have been lighting at home, do not hesitate now, on the floor of the House, to avow themselves disunionists. Under such circumstances, to combine for the election of a Southern Demo-erat as Speaker, would be fraught with most imminent danger to the Union. It is, thereimment danger to the Onon. It is, therefore, morally certain, after these declarations, and those of Messrs. Hickman and Haskin, that the opposition will organize the House. That part of the game having failed, how will the Herald and other Administration organs restore the confidence formerly existing between the merchants of the North and

organs restore the comidence formerly exist-ing between the merchants of the North and South? Will they have the manliness to come out and retract their false charges and representations? Will they persist in charg-ing that the whole Republican party were in favor and siding and abetting the John Brown ruid, and expect the South to believe that the whole force which that great and powerful party could raise in the United States and Canadas was a single score of States and Canadas was a single score of men? Will they still insist that the Helper book was dangerous in itself, and calculated

THE SENTINEL.

Terms of the Bentinel. GASH, INVARIABLY IN ADVANCE

The snow had began in the gloaning, And busily all the night Had been heaping field and highway With a silence deep and white. Every pine and fir and hemlock, Wore ermine too dear for an earl; And the poorest twig on the chattee Was ridged inch deep with year.

From sheds, new roofed with Carrara, Came Chandoleer's modfed crow, The stiff rails were softemed to swan's down— And stid fluttered down the snow. I thought of a mound in sweet Auburn, Where a little head-stone stord, How the flakes were folding in gently, As did robins the bases in the wood.

Up spoke our own little Mabel, Saying, "Father, who makes it s And I told of the good Alifather, Who cares for us all below.

Again I looked at the show fall, And thought of the leaden sky That arched o'er our first great sorrow, When that mound was heaped so high-I remember the gradual patience That fell from that cloud like snow, Plake by flake, healing and hiding The scar of the deep-stabled wee,

And again to the child I whispered, OThe snow that hardened and Darling, the merciful Father Aloue can make it fall?"

Then, with eyes that saw not, I kissed her, And she, kissing back, could not brow, That may kiss was given to her sister Folded close 'neath the deepning snow, -----

TS PERMANENTLY LOCATED IN ONE
of the most breathy cities on Lake Michigan, between Milwaukee and Chicago, and has been thoroughly restricted and enterged so as to accommodate a large number of patients. Experienced nurses are constantly employed to attend all patients at the Cure. Dr. Seeley is the attending physician, whose reputation is unequaled in the cultive year.

By For particular and circular, address and carefully made, there are 7,546,948 actual church-going men of the Church of England, or 42 yer cent of the gross population; and 4,466,266 nominal churchmen, but practically of no church, or 25 per cent. of the gross population. So that the field of operation of the clergy, ministerial and missionary, is spread over 67 per cent. or 12,913,214 of the community at large. On the other hand, the chapel-going Roman Catholies in England amount to 610,786, or 31-2 per cent. of the whole population. The chapel-going Raphitists (six different kinds) to 457,191, or 2 1-2 per cent. The chapel-going Meeleyan Methodists (seren different kinds) are 2,264,321, or 13 per cent. And all other Protestant Dissenters, including in the number Jews and Mormons, are estimated at 1,286,246, or 6 3-4 per cent. The total of worshipping or bona fide Protestant Dissenters is 5,303,609, or 29 1-2 per cent. of the gross population.

Again, there 1s an alamming picture presented of the irreligion in which Large record.

cent. of the gross population.

Again, there is an alarming picture presented of the irreligion in which large masses of the population are steeped. For example, in Southwark there are 68 per cent. of the people who attend no place of worship: in lambeth, 60 1-2; in Sheifield 62; in Oldham 611-2; in Gateshead 60; in Preston 59; in Brighton 54; in the Tower Hambets 53 1-2; in Finsbury 53; in Salford 52; in South Sheids 52; in Manchester 51 1-2; in Bolton 51 1-2; in Stoke 51 1-2; in Westminister 50; and in Coventry 50. So that in all those places, except the two last named cities, the odds are on the sido of those who habitually absent themselves from every religious service whatever. Of 34 of the great towns of England, embracing an aggregate population of 3,993,

embracing an aggregate population of 3,993,-467, 2,197,388, or 52 1-2 per cent. of the community are wholly non-worshipping. But community are wholly non-worshipping. But this is, beyond question, to some extent at this is in this is, beyond question, to some extent at the particula el-building. ie sum expended annually in the repairs of the fabrics and the maintenance of the clurred services is nearly \$500,000, of which only about \$250,000 is raised by rate. There having been no ecclesiastical census before 1851, few or no reliable means exist for com-

paring the religious phenomena of the present day with those of half a century ago; but, in answer to the Archbishop of Canterbury, the Rev. Dr. Hume, the incumbent of a parish, populous and poor, in Liverpool, and a witness before the committee, expressand a wirness before the committee, expressed and observation, founded on long experience and observation, that the large masses of the population who attend no place of worship whatever are in danger of being lost not only to the Church, but to religion altogether.—

The population of the country, always on the increase, is becoming more and more a town population. In 1851 there were 6,000,000 tiving in towns of 10,000 people and unoon living in towns of 10,000 people and up-wards, and only 8,000,000 in smaller towns, in villades, and in rural districts. Dr. Hume apprehends that at the close of the present century 70 per cent, of the gross population will be located in large towns; and therefore, he adds, if our large towns are left to them-selves, practical heathenism must inevitably outgrow Christianity.

WE SHALL EE CHANGED.—They laid Christ's body, torn by the crown of thorns, pierced by the nails and the spear, all bloody and cold and dead, in the tomb; but he was changed, and how glorious was he when he showed himself to Saul of Tarsus, and to John, his beloved disciple, on the Isle of Patmos! They laid Stephen's body, all bruised and mangled with stones, in the grave; but he will be changed, and will come from that grave in brightness and glory.—They buried John the Baptist, with his head cut off by the wicked, but he will come from that grave with a crown of life on his head. water street, has conthat grave with a crown of life on his head.

After the news No. 1 did not go ontside of 93c, and 95@97c was the range for Club to Extra. The market for flour wa-at a stand. Buyers were offering \$4,37@4.40 for brands that sold at \$4,50@4,60 a few days ago, but holder were not willing to come down to ther views.

CHICAGO PRODUCE MARKET, -- Receipts yesterday: 2,695 bbls flour; 14,506 bus wheat; 7,973 bus corn; 4,355 bus The Press & Tribune says:

The Press & Tribana says:

The Boar market was dull and inactive, with limited sales of good Spring extras at \$4.60, and choice at \$4.75. Wheat quiet and unchanged—the sales of No. 2 squing ranging from 90@91c in store. A small lot of No. 2 red Winter was sold at \$6c in store. Corn netwanced 1c, with sales at 44c for No. 1 in store, and 46c for No. 1 snot of the same of the form of the same of the s Failure of a Chicago Packing House.—The Fress & Tribune notes the suspension of Mesers, Van Brent i Warnous, extensive pork packers and dealers at Chicago and New York. As they had operated but little

PORK AND PROVISION TRADE, This has been unquestionably the dullest day of the season in the pork market. The sales in all reported do not exceed 400 head at a range of \$5.25@.6 for lots averaging 150 to 300 pounds, and receipts being considerable and the markets elsewhere continuing to droop, packers were not at all anxious to buy even at the inside quotation. Large loss of light hogs were pressed on the market at 45@5,50 but without finding purchasers. The receipts for the twenty-four hours ending moon to-day are 1,664, which increases the total for the season to \$4,711 head, including live and dressed, which is very nearly equal to the whole num ber packed here last year.

Cincinnati, Dec. 15rit.-Hogs dull. Sales 1,500 at \$5,40@6. Receipts to-day 25,000. Provisions time tled and lower. St. Louis, Dec. 1574,--Hoge-Sales were 250, rang-

ing \$5@6,25 for light to heavy; 600 averaging 220 m at \$6,25; 220 at \$6@6,25; 100 averaging 175 ms a

at \$6,20: 229 at \$60,6,20; 100 averaging 140 ms at \$5,555.

Cincinnati, Dec. 247a.—Hogs are gradually tempering down, and are now fully 25c per owt, lower for heavy bogs, and 56c lower for light than they were at the date of curlist review. As hereefore remarked, the standard for good heavy weight hogs will be maintained at about present prices, \$6.40; that is, for such as make mess pork suitable for the Boson market. The run of light weights is in larger proportion than was anticipated, and compared with last year, it is thought that up to the present time there is a proportionate failing off in the yield of mess pork. The receipts of hogs to date, from Nov. 18t, foots up near 235,000. Those now coming in are mainly from Ohio and Indiana-Kentacky having furnished the greater part of her quota already. During the past 24 hours the receipts have been rather larger than was expected, which, added to wrat were in the pensifton the heavy arrivals of the previous two days, makes the market quite tame for the present. Should it survive the combination of circumstances now operating seriously to depress it still farther than exhibited by today's transactious, viz. \$5.50 for averages or 16t. fbs, and \$6.40 for heavy, say 2150,220 Ba, there is abundant confirmation, we think, for our conclusion that there will be but little variation from the present stundard for desirable hogs.

The packing at interior points in, sot, as large as arrangements were generally made for, owing to the fact that this market has altipated hither-many hegs, which will doubtless find their way busic into the control of the present of the present concessions are made to day of \$50 km and \$600 for heavy and \$60
